

# CUSTOMER-RETENTION- DATASET

A CASE STUDY

# DATA SOURCES AND INFO:

- 1. There are two sheets one is detailed and second is encoded in the excel.
- 2. Using `data.shape()` we get dimensions i.e. 269 Rows and 71 Columns.
- 3. Using `data.head()` we display the first five rows of the dataset.
- 4. Using `data.info()` we get info of the features of the dataset and we get “70” object type features and 1 “int 64” type features.

# Load the dataset from excel

What is the operating system (OS) of your device?	Longer time to get logged in (promotion, sales period)	Longer time in displaying graphics and photos (promotion, sales period)	Late declaration of price (promotion, sales period)	Longer page loading time (promotion, sales period)	Limited mode of payment on most products (promotion, sales period)	Longer delivery period	Change in website/Application design	Frequent disruption when moving from one page to another	Website is as efficient as before	Which of the Indian online retailer would you recommend to a friend?

5 rows × 71 columns

# There are a huge no of features, it makes sense to devide the data into three categories:-

```
# categorical_columns can be located from column index 0 to 16  
categorical_columns=data.iloc[:,17].columns  
categorical_columns=categorical_columns.to_list()  
  
# rating_columns can be located from column index 17 to 46  
rating_columns=data.iloc[:,17:47].columns  
rating_columns=rating_columns.to_list()  
  
# ecommerce_columns can be located from column index 47 and above  
ecommerce_columns=data.iloc[:,47:].columns  
ecommerce_columns=ecommerce_columns.to_list()
```

# CHECKING FOR THE NULL VALUES:-

From the plot we can see there are no null values present in the Dataset

```
# Identifying null values  
sns.heatmap(data.isnull())  
plt.axis('off')  
plt.show()
```

# DATA VISUALIZATION:

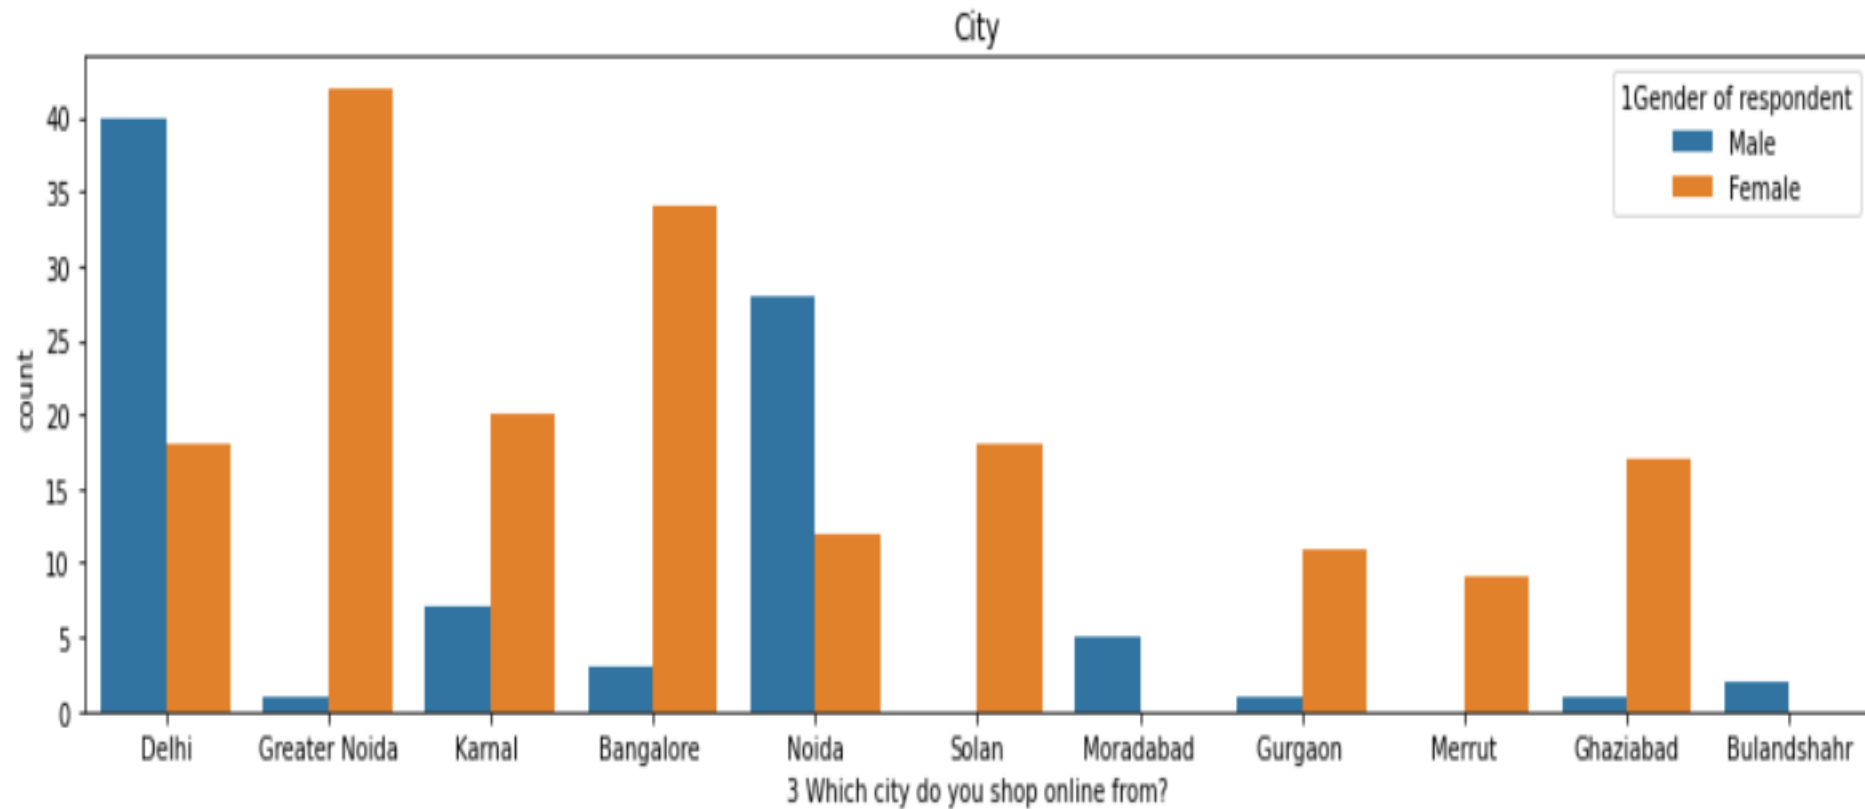

From the plot we can say that gender column has more Female(181) as compared to Male(88).

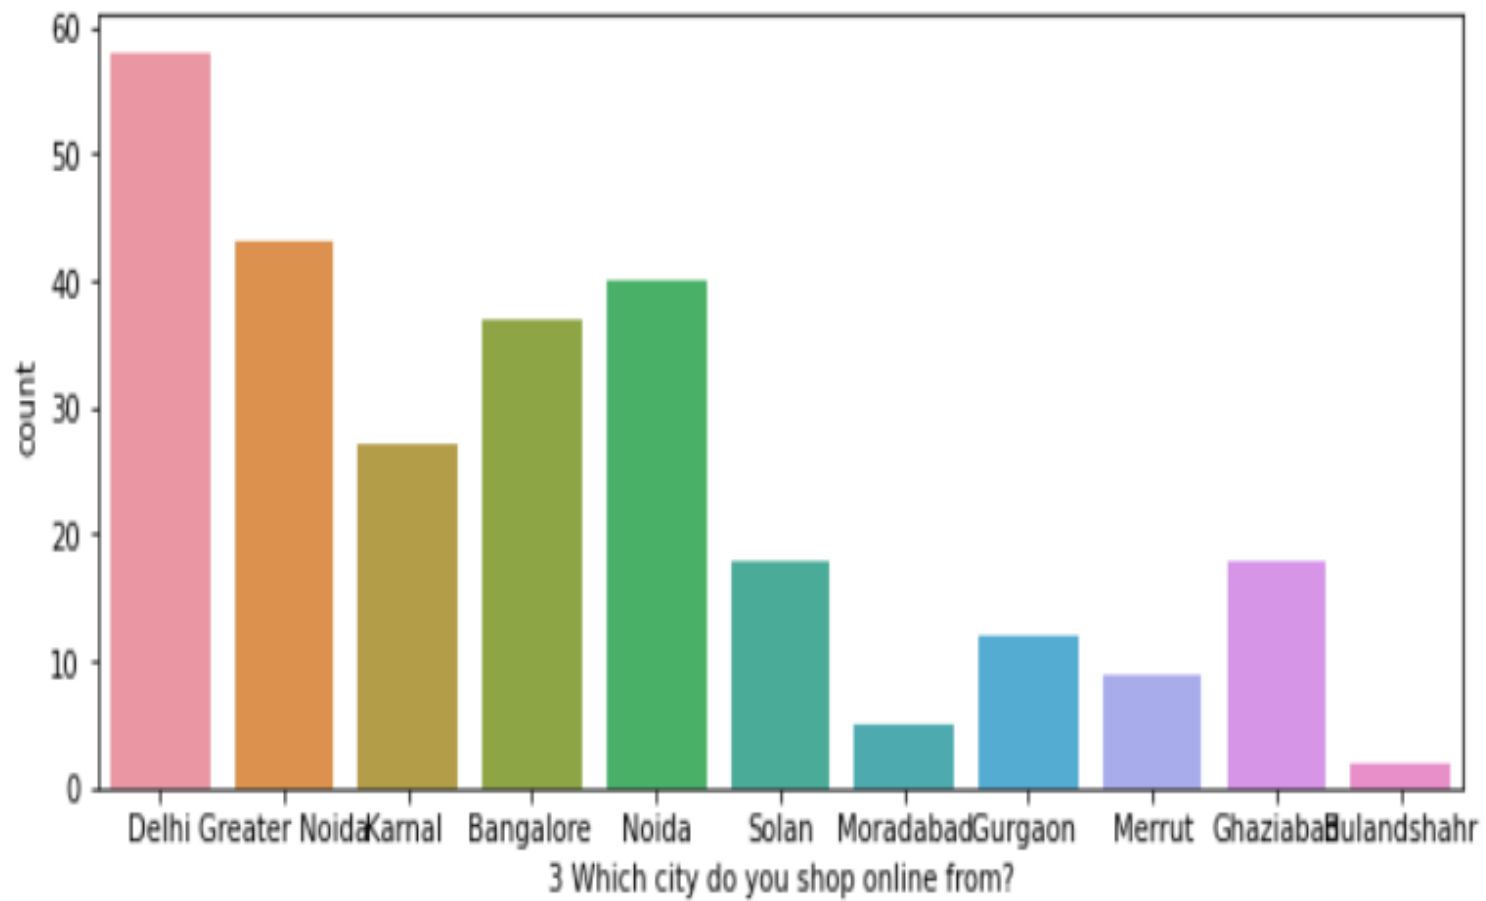

From the plot we can see that females are more compared to male in every age group.

Cities like Delhi, Noida, Moradabad and Bulandshahr has more male shoppers. where as cities like GreaterNoida, karnal, Bangalore,solan,gurgaon,meerut, ghaziabad has more female shoppers.

# UNIVARIATE ANALYSIS:

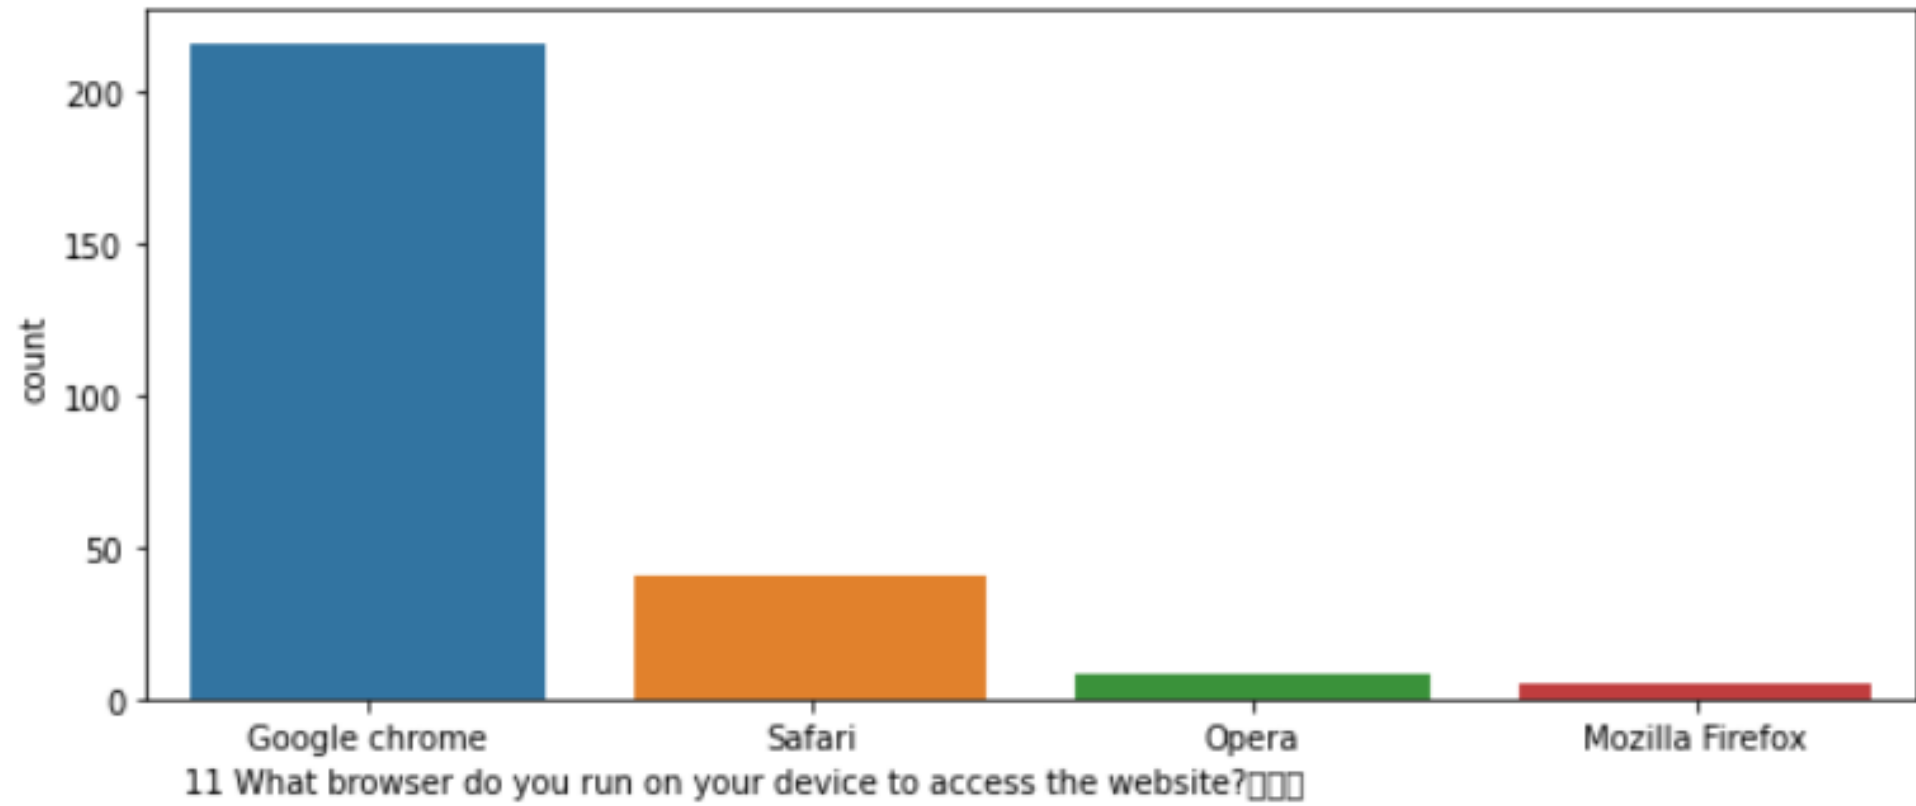

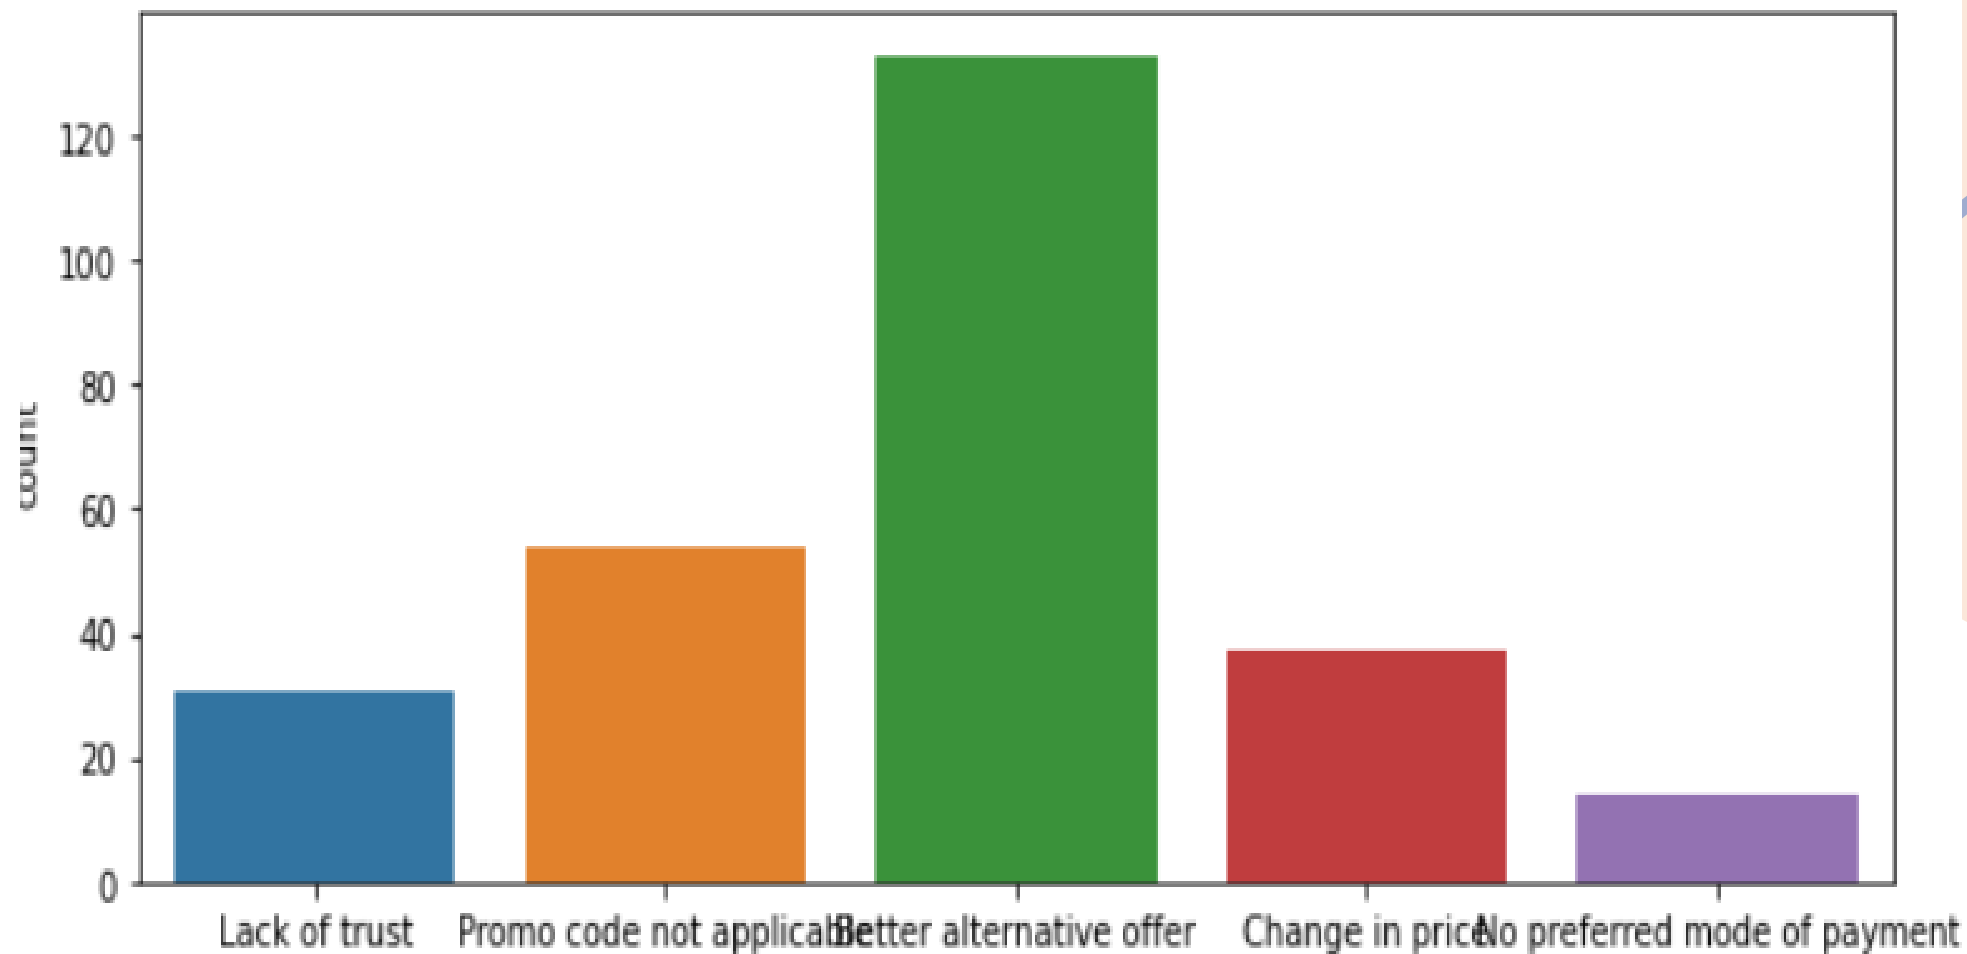

16 How frequently do you abandon (selecting an items and leaving without making payment) your shopping cart?□□□□□□□

# OBSERVATIONS:

## Conclusions:

1. 80% of the people are within age group 31-40 years, 80% (approx.) of the people are within age group 21-30 years and 72% (approx.) of people are within age group 41-50 years. So we can say that 70-80% (approx.) of people lie within the age group of 21-50 years. 20% (approx.) of people lie within the range of less than 20 years or more than 50 years old. 2. Cities like Delhi, Greater Noida, Noida and Bangalore have the maximum number of online shoppers. 3. Maximum number of customers have been using Online Shopping platforms for more than 4 years. 4. The maximum purchases made in past 1 year by the customers are less than 10 times as compared to 31-40 times and 41 times and above. 5. The maximum customers (142) use Mobile internet for online shopping. 6. Maximum customers are using Smartphones and then some are using laptops but very few people are using tablets for shopping. 7. Most of customer screen size of mobile lies in others range and then customers use 5.5 screen size mobile for shopping. 8. The maximum number of customers are using Window/Windows Mobile as operating system for online shopping. 9. Maximum customers use Google Chrome as the browser for online shopping. 10. Search Engines are the most used channel which they follow to arrive at their favourite online store for first time. 11. After the first visit, most of customer reach the online store through search engine. 12. Most people take purchase decision after spending more than 15 minutes. 13. Credit/Debit cards are the most used mode of payment option. 14. Maximum people abandon the items in cart 'sometimes' as opposed to never or frequently. 15. The biggest reason to abandon the "bag". "Shopping Cart" is that they get a 'Better alternative offer'.

# VALUE COUNT FOR PINCODE COLUMN:

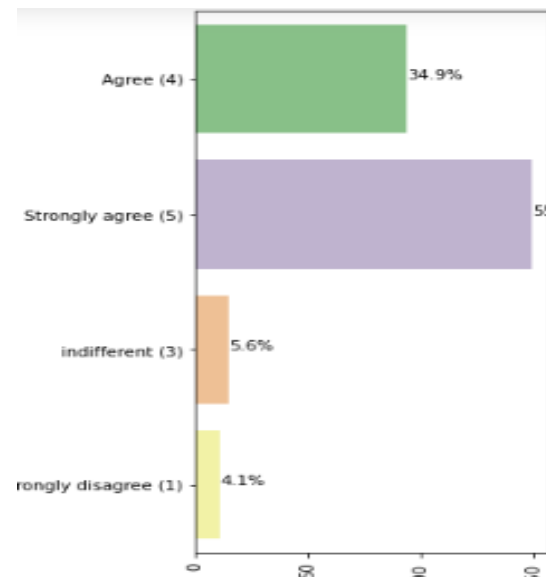

# CHECKING HOW MANY TIMES MADE AN ONLINE PURCHASE IN THE PAST 1 YEAR:

# OBSERVATION:

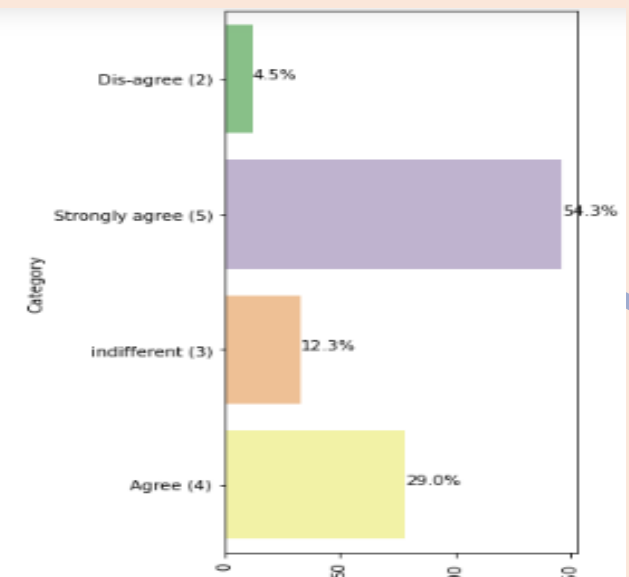

1 The richness, availability of several communication channels (email, online rep, twitter, phone etc) shopping gives monetary benefit and discounts

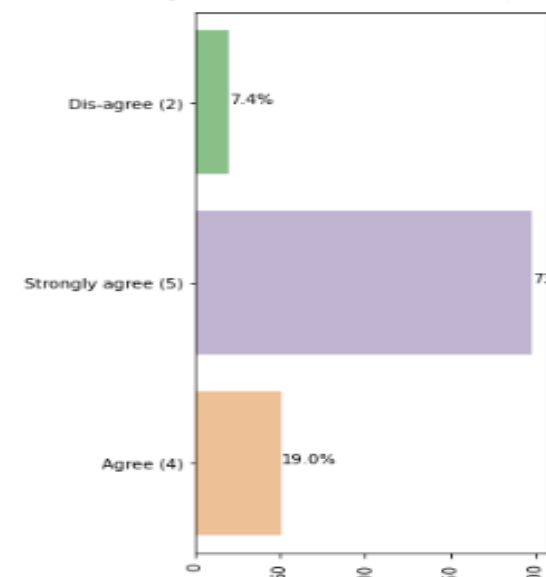

2 Online shopping gives monetary benefit and discounts

3 Enjoyment is derived from shopping online

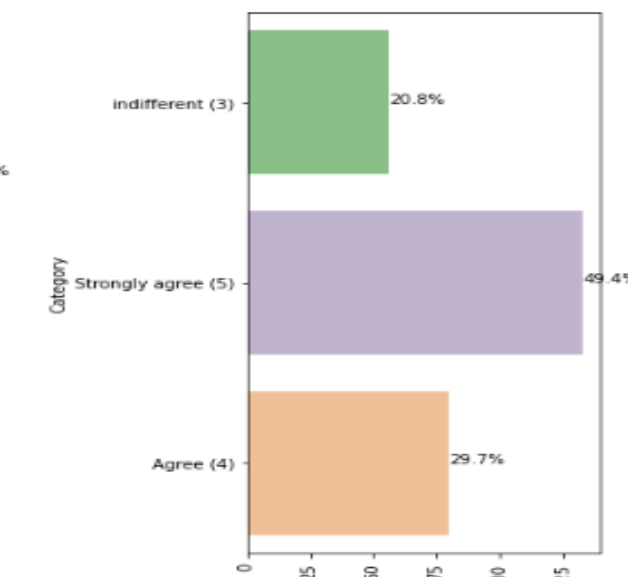

4 Shopping online is convenient and flexible

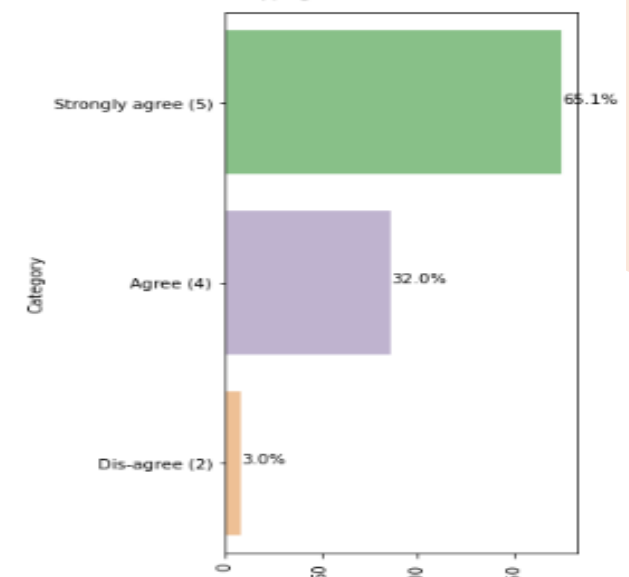

5 Return and replacement policy of the e-tailer is important for purchase decision

6 Gaining access to loyalty programs is a benefit of shopping online

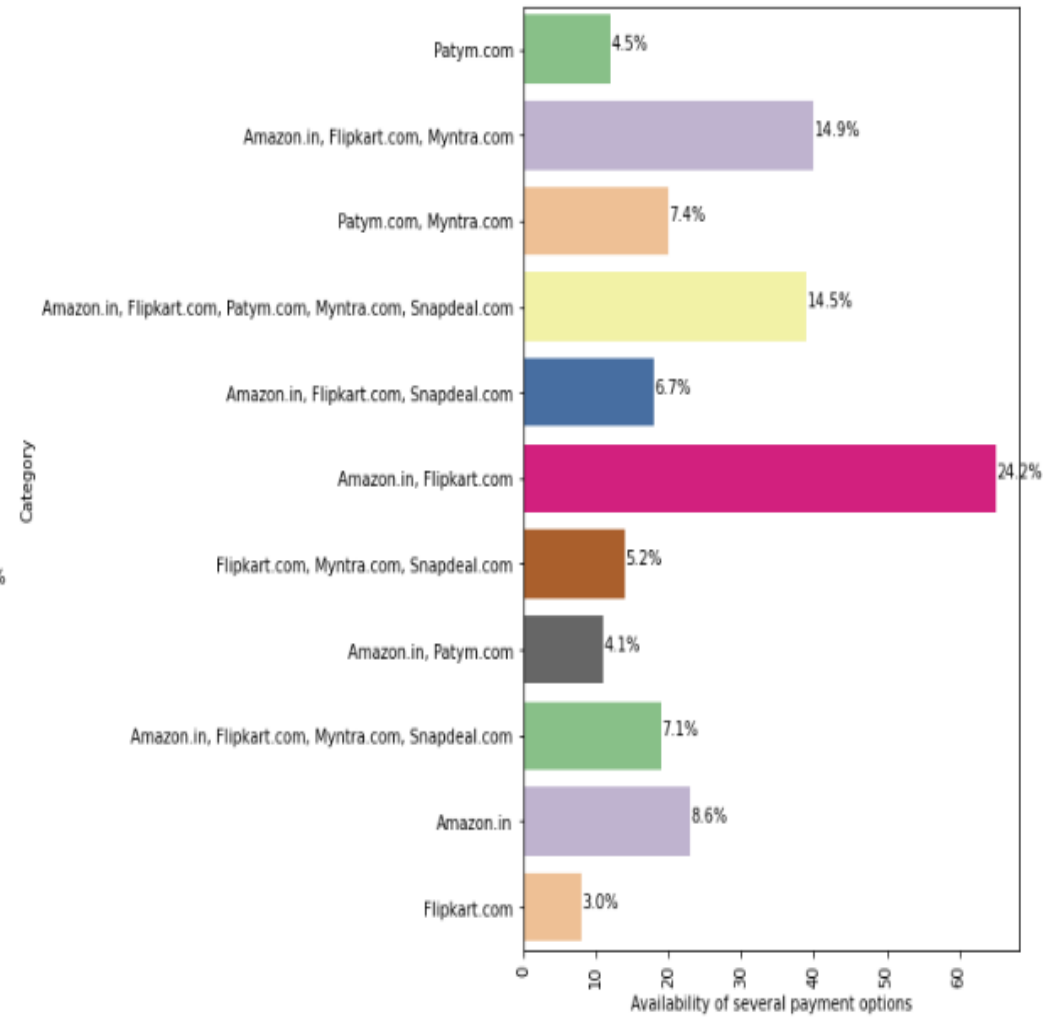

7 Displaying quality information on the website improves satisfaction

8 Users derive satisfaction while shopping on a good quality website

# CONCLUSION:

HIGH CUSTOMER SATISFACTION AND RETENTION: 1.Amazon.com 2.Flipkart.com

HIGH RISK OF CUSTOMER CHURN: 1.Myntra.com 2.Snapdeal.com
